WOMEN'S HEALTH IN THE CONTEXT OF CLIMATE CHANGE

Planetary Health is Women's Health.

In 2022 alone, 9 million people worldwide died from industrial CO2 emissions. That is a rise of 66 Percent since 2000. Particularly affected: the most vulnerable groups - women, girls and children.

Climate change poses a particular challenge to women's health and well-being.

Health is a Human Right.

Women and girls are more vulnerable to water- and vector-borne diseases, malnutrition, maternal mortality and gender-based violence.

Why is this?
And how can we ensure the well-being of all within planetary boundaries?

Let's talk about it.

Listen to the Science!

Global North meets
Global South.
Meet our keynote
speakers!

**Prof. Dr. med. Eva
Kantelhardt**

Head of Global &
Planetary Health
AG, Medical Faculty
of the Martin Luther
University Halle-
Wittenberg in
Germany.

Melvine Otieno

Environmental
health scientist &
Founder of the
Planetary Health
Eastern Africa Hub
in **Kenya.**
